

AiM Webinar
“Motorsports Simulation”
5.28.20
Edited Q&A

1 **Q:** This would be a great learning/training tool for the Karting community. Is it there a plan to include Kart Racing Pro (KRP) into the sim that can benefit from this?

A: [Answered live]

2 **Q:** How do you guys who do sim racing introduce your own skin in the game knowing that all you have to do, if something goes wrong, is hit reset?

A1: The biggest part, I find, is to try to do exactly what you would in real life. Start with a track you know very well and then do the same with your inputs as you would in real life at that track. When I try to drive too fast on the sim I see my lap times increase and wreck a lot. When I do what I do on the track in real life, suddenly, the lap times come down and the wrecks are few and far between.

A2: Race! Or at least do Time Trial. You can't reset to a win, or a competitive lap time averaged over 5 clean laps. Also, pay attention to your iRating and Safety Rating - both are impacted by any form of bad driving.

A3: This is a sim, so treat it like you would in real life. Pilots use sims to practice emergency situations that are hard to replicate in real life. The reason they do this is because the controls and the response of the plane in the sim are very similar to real life. In racing, this is the same. Use it to practice how you would drive in real life with the same rhythms and movements.

A4: [Answered live]

3 Q: Can RS3 also import .csv files from other brands of DA hardware?

A1: There is no .csv import tool available at this time.

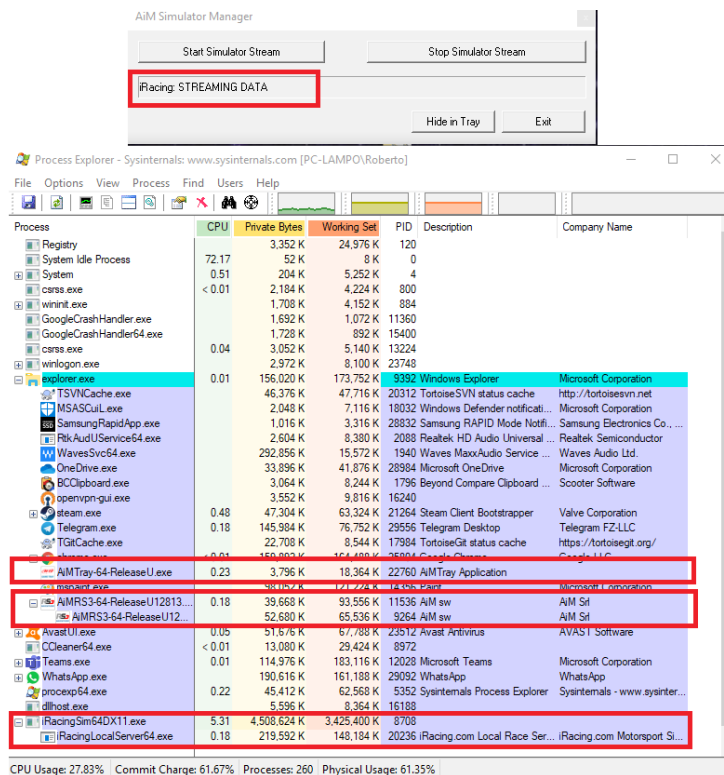

A2: Assetto Corsa (not ACC) and NetKar Pro can be imported natively into RaceStudio Analysis.

4 Q: James, other than VRS, is there a tool that will tell iRacing to start telemetry on every session?

A: [Answered live]

5 Q: In addition to RAM used, how much CPU resources does Sim Manager use?

A: [Answered live]

6 **Q:** Which AiM hardware is currently supported?

A1: MXS 1.2, MXS 1.2 Strada, MXP, MXP Strada, MXG 1.2, MXG 1.2 Strada

A2: [Answered live]

7 **Q:** Does anybody use OneDrive to manage all their AiM data as a backup and for portability across devices?

A: I have had conversations with people who use this, Dropbox, etc. It can be a little troublesome at first, but it seems to work well once everything is setup properly.

8 **Q:** Is it possible to overlay/compare a real session with a sim session?

A: Absolutely! You'll actually see that comparison in this webinar.

9 **Q:** Is it possible to get track condition and car setup automatically populating AiM's session comment field?

A: [Answered live]

10 **Q:** Emiliano, do you want us to forward bugs/glitches we find to software@aim-sportline.com?

A: Yes, please.

11 **Q:** Who defines basic vs advanced channels? Can a few be moved into basic?

A: [Answered live]

12 **Q:** Will Strada devices log data from the sim?

A: Any compatible dash (Strada or logger) will just be used for display on the simulator rig. The data is logged by the sim program.

13 **Q:** Can we talk briefly about the future availability of Kart Racing Pro or karting sims in general?

A: [Answered live]
