

AiM Sports Webinar
"RaceStudio3 Analysis Beta Part 2"
7.28.20
Edited Q&A

1 **Q:** Is it possible to export the channel report to Excel or CSV?

A: [Answered live at 42:49]

2 **Q:** Is it possible to have the data you use for this webinar to practice with?

A: It will be linked in the description of the YouTube video once this webinar is posted.

3 **Q:** Will it be possible to link a video that's not coming from a SmartyCam?

A: No.

4 **Q:** Can you drag the videos to a separate monitor?

A: Yes, you sure can.

5 **Q1:** Do touch screens like the Surface Pro work well for Analysis? Will RS3A be better adapted to them?

A1: Touchscreens are usually not the best way to go for various reasons, especially trackside. Someone who is super familiar with the program probably won't have issues. For someone who is touch happy or unfamiliar, it would cause more headaches than a standard laptop.

A2: I use a Surface Pro with RS2, RS3, and RS3 Beta all the time. It works fine but, as Robinson pointed out, if people touch it, your position gets moved, new windows are opened, etc. It's a touchscreen issue, not an AiM issue, in my experience.

Q2: Provided no other people touch your screen, can you effectively use it? Can you zoom in on a sector, activate/deactivate a channel etc. with the touchscreen?

A3: Yes, it works as normal. It is just not optimal.

6 **Q:** How do you select SmartSync?

A: There is no action from the user required, it is automatic.

7 **Q:** Would SmartSync be able to use less markers on the straights and more in the corners so that the information in the corners is more exact?

A: [Answered live at 40:53]

8 **Q:** Is the GPS data that the SmartyCam is storing coming from the Solo2 DL?

A: Yes. If it's connected to a Solo2 DL then that is where the SmartyCam is getting its GPS data.

9 **Q:** How do you change or remove things on the measures graph list?

A1: Use the right click button on your mouse while over the window. It will allow you to add or remove visual objects.

A2: [Answered live at 43:48]

10 **Q:** Any idea when we will be able to use math channels in RS3A?

A: [Answered live at 40:02]

11 **Q:** Can you sort channels on the measures graph?

A: [Answered live at 52:48]

A: As of right now in RS3A, you can sort by configuration, channel type, or alphabetical.

12 **Q:** What is the gray line in track window on middle of the track? Is there any way to get rid of it?

A: [Answered live at 51:14]

13 **Q:** How will RS3A work with older equipment like the XG Log?

A: You will be able to import the data but, with any units that aren't managed by RS3, certain functions including video sync will not work.
