

# LOOSE WIRES

## SmartyCam Contingency

*AiM Sports is giving SuperNats competitors the chance to win BIG*

AiM Sports has teamed up with long time partner, SKUSA, to bring SuperNats competitors the opportunity to proudly dawn some *smart* hardware on this year's podium. Drivers in each of the 11 classes will get the chance to race to the finish for the latest in video

and data integration technology. Each qualifying first-place finisher on SuperSunday will receive a brand new SmartyCam video system (valued at \$1,100.00). Winning is simple... just sign in, sticker up, and peddle down!!!

### Video insight...

The SmartyCam video system is the first onboard camera designed specifically for motorsport applications that pairs striking video imagery with real-time data overlay, integrated GPS, Micro SD recording technology, and a three-axis accelerometer.

The easy-connection insight that is embodied in the SmartyCam becomes clear once linked to

a MyChron 4. Instantly you are able visualize speed, RPM, lap times, temperatures, track position, and much more.

The powerful Smarty Manager software gives you the freedom and flexibility to configure your system your way—with a variety of gauge packages, logo options, and custom overlays.

### CONTINGENCY PARTICIPATION

Registration is simple. Each driver will receive a copy of the official registration form and contingency requirements sheet in their Driver Information Packet at SKUSA Registration. Simply fill out the registration form and return it to the AiM Sports tent located along turn 13, in vendor row to receive your three mandatory

SmartyCam decals. Eligible winners on SuperSunday in each of the 11 participating classes will receive their very own SmartyCam video system. For participation details and more information, contact us at 800.718.9090.
