What are User Profiles?

The following is from the AiM RS3 Help Document loaded on your PC and ready for you to access

A User Profile is a set of windows showing your data

Properly, a profile is made of layouts. There are some default analysis layouts (see [Getting Useful Information](#)), available for a prompt use. You can create your [Custom Layouts](#). You can identify layouts with tabs in the main analysis window.

Properly, a layout is made of panels. You can identify panels with windows inside any tab.

Why Use User Profiles?

- AiM Race Studio 3 User Profiles are a very powerful, yet easy to use tool that all RS3 Users should strongly consider using.
- If you find yourself doing an analysis task more than once, save it as a User Profile and your data analysis will be measurably more efficient.
- User Profiles enable you to prepare prior to arriving at the track, adjust your User Profiles as you find improvements, and be even more prepared for the next session!
