"Lap Replay and Dashboard Functions"
10.28.20
Edited Q&A

1 **Q:** Do you have two different test runs open under Lap Replay?

A: [Answered live at 21:48]

2 **Q:** Can you pick a "zero" reference position on the track, effectively creating a zero distance between the runs, to allow you to align their positions and just look at one segment?

A: [Answered live at 22:22]

3 **Q:** If you could combine Lap Replay with Dashboard, that would help when comparing two laps. Is it possible to add this to RS3 Analysis beta?

A: In RS3 analysis it should already be possible using the map and setting the time/distance plot snap to 'off'.

4 **Q:** Can you scale down the steering? For instance, if the input stays two degrees or less?

A: [Answered live at 32:50]

5 **Q:** Does the dashboard display only one lap at a time?

A: [Answered live at 34:15]

6 **Q:** Can the dashboard steering wheel also be used for handlebars on a motorcycle?

A: [Answered live at 33:42]

7 **Q:** Is it possible on the Lap Replay function to overlay two laps and zoom in on GPS position to show differences in the driven line? I.e. used to show the kids that an early apex is generally going to be slower exit speed.

A: [Answered live at 37:09]

8 **Q:** Would the Dashboard be able to show when brakes were applied?

A1: Yes. If you have a brake pressure sensor, it will be represented as a bar that is filled with color the more brake pressure is applied.

A2: [Answered live at 41:47]
