

AiM Webinar
"RaceStudio3 Analysis – Update 7"
2.16.21
Edited Q&A

1 Q: Any chance of an ETA for the missing range operators in the channel reports?

A: We are doing some testing on the missing operators and it is very likely they will be included in the next beta release.

2 Q: Do you have an ETA of the "real" release RSA3?

A: Not at this time.

3 Q: I just got a sim with Assetto Corsa Competizione, is this compatible with AiM?

A: Yes.

4 Q: How do you show the best rolling lap?

A: The best rolling time is highlighted by the yellow background. In the session displayed, the best rolling time happens to match with the best lap from start to finish.

5 Q: Can you add or remove splits?

A: Yes. if you right-click on the colored bar, a context menu appears allowing you to add/remove/rename sectors.

6 **Q:** Can we be allowed to change the channel names of simulator channels? Can you expand the real life analog/ECU channel field character maximum beyond 16 so we can match them up for profiles and math channels?

A: [Answered live at 1:05:05]
