

AiM Webinar
"Data Analysis You Have 20 Minutes"
7.2.20
Edited Q&A

1 **Q:** Questions asked to live attendees for a place in the data were speed differences jump out at you

A: 7200 ft. Todd Carver rocksteadyracing40@gmail.com 25min

2 **Q:** Questions asked to live attendees for a place in the data were speed differences jump out at you

A: 6000 ft Tom Iannotti Thomas.Iannotti@gmail.com 26min

3 **Q:** Questions asked to live attendees for a place in the data were speed differences jump out at you

A: 1200ft Bruce KosakoskiBkbbmw@gmail.com 26:10:

4 **Q:** When will the RS3 that incorporates the SmartyCam video be released?

A: We are working on it and may have a public beta for users to see the current progress of the software available very soon. (RS3 Public Beta was released on 7/9/20 and we did it during one of our live webinars. Here is a link: <https://youtu.be/IHtEmwYD4k4>)

5 **Q:** How did the time compare bar come up on its own?

A: [Answered live at 27:22]

6 **Q:** How do you toggle between mph and kph on Y axis?

A: This needs to be changed in the preferences when all tests are closed. File > Preferences.

7 **Q:** Which way are we going on the GPS trace?

A: [Answered live at 32:57]

8 **Q:** Is it better to look at the GPS or to export it to Google Earth?

A: [Answered live at 35:32]

9 **Q:** What is your opinion on finding areas to coach improvement when your driver is consistent, but consistently slow?

A: [Answered live at 1:01:25]

10 **Q:** Before analyzing the data, we have to select the sample rate for the sensors. How can we calculate the correct sample rate?

A: We did a later video on this exact subject which you can find here:
